#### DETAILED ACTION

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

# Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 19, 21-23, 25, 32-35, 37, 39, 40 and 58 are rejected under 35 U.S.C. 102(e) as being anticipated by Satran et al. (6,270,292).

Satran et al. discloses the claimed invention comprising, as shown in Figs. 1 and 4, a first edge corner(8) having a corner angle less than 90°, and an adjacent second edge corner(8) having a corner angle of less than 90°, wherein the tip(1) is formed of an approximately quadrilateral-shaped plate.

Note Satran et al. also discloses the limitations described in claims 21-23, 25, 32-35, 37, 39, 40 and 58, as shown in Figs. 1 and 8A, such as: in claims 20 and 37, a third edge corner(8) having a corner angle of less than 90°; in claims 25 and 40, the seating face(12) being not parallel to the cutting face(3); and in claim 32, a plurality of tips(1a, 1b) mounted to the distal end of the tool body; and at least one of the first and second corners(8, 8) is arranged to project along an outer periphery of the distal end of the tool body(27).

# Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 24 and 38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Satran et al. view of Tukala et al. (5,622,461).

Satran et al. discloses the claimed invention except for: the seating face being parallel to the cutting face.

It is well known in the art that the relative orientation of the cutting face to the seating face is just an alternative arrangement as required.

Tukala et al. discloses a cutting tool comprising cutting tips(16, 17) having the seating face being parallel to the cutting face.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Satran et

al.'s tool to comprise the seating face being parallel to the cutting face, as taught by Tukala et al., since it is just an alternative arrangement comparing with that of Satran et al.'s tool.

# Response to Arguments

6. Applicant's arguments mailed 12/23/02 have been considered but are most in view of the new ground(s) of rejection.
